

## **PREDTAN SKIN**

---

### **ENHANCES WINE MOUTHFEEL, ROUNDNESS AND PALATE LENGTH**

#### **PROPERTIES**

**PREDTAN SKIN** is tannin extracted by direct pressure from freshly pressed grapes.

#### **APPLICATIONS**

**PREDTAN SKIN** fulfils all the function of tannin present in the grape.

**PREDTAN SKIN** protects the color:

- By stabilizing the anthocyanins with stable covalent tannin-anthocyanin bonds
- By protecting the color compounds in the oxidation process.

After malolatic fermentation, **PREDTAN SKIN** permits a perfect clarification and stabilization of the wine.

**PREDTAN SKIN** contributes to the organoleptic improvement, bringing structure as well as roundness.

#### **DOSAGE**

It is recommended to use **PREDTAN SKIN** at a dosage between 2 to 20 g/hl of red and rosé wine after dilution in wine. The dosage, and therefore the treatment cost, can be optimized by doing direct trials in bottles at different concentrations.

After **PREDTAN SKIN** has been added, it is recommended to carry out normal racking until bottling preparation.

It is recommended to add **PREDTAN SKIN** at least two weeks before bottling.

#### **STORAGE**

Sealed bags may be stored in a cold and dry place, away from contaminants and chemicals with intense odors.

#### **PACKING**

Pot of 500g.

**CONFORMS TO THE INTERNATIONAL OENOLOGICAL CODEX**
